

NAVY SHIPS – INDONESIA

In December 2012, ZINGA has been approved for application in the protection of ships in the Indonesian Navy. A demand for a 6 year corrosion protection in combination with an anti-fouling or fouling release system was specified for Indonesian Navy Ships.

In February 2013, a Navy ship was treated with ZINGA in duplex with the LioCyl fouling release system in a black colour.

**System:**

ZINGA	1 x 80 µm DFT
LioCyl Midcoat	1 x 75 µm DFT
LioCyl Topcoat	2 x 60 µm DFT
