

HAT BORU PIPELINE – TURKEY

Hatboru is a family owned company, established in the 1970's, located in the south east of Turkey. It is the 3rd biggest spiral welded steel pipes producer in Turkey with very qualified leading people and equipped with latest generation production line.

The company pipe production is based on specifications and/or articles and conditions given by the customers of Hatboru.

The company contacted us in end of November 2011 for a delivery of ZINGA, which will be used on outside of welded pipes for a potable water pipe line project in Azerbaijan.

The total project is a pipe line of 120 km which was finished in 4 sections of 30 km each in 2012. In total about 30 Tons of ZINGA were used.

Surface preparation:

grit blasting or Bristle Blasting to
SA 2,5 and Rz 50-70 μ m

System:

ZINGA 1 x 60 μ m DFT
